Introduction

There are many ways to do things...and on the piano there are seemingly billions! The forest of black and white keys can be very daunting for a person who is new to the piano, but there is good news...you have a Cheat Sheet!

Each page will have:

- A **KEY** represented in the title and at the top left with a **SCALE**.
- The **COMMON CHORDS** that go along with that key and a professional way to play them.
- A **GOING PRO** section to take you to the next level with: The **PENTATONIC SCALE** and how to play it (wonderful scale to use for improvisation) and **NASHVILLE NUMBERS** to get you to start thinking in numbers.

DISCLAIMER: Even though I am calling these "Cheat Sheets" you should not feel remorse or the sudden urge to hide them when someone walks by...though it still might be fun to tape them to the seat in front of you. That was a joke.

How to Use "Cheat Sheets"

With YouTube Video Lessons

These "cheat sheets" were specifically designed to go along with my FREE YouTube videos. You can find these videos on the "pianomeditation" channel. You can also find an organized list of all of the videos at the website pianomeditation.com. Just click on FREE LESSONS.

Without YouTube Video Lessons

Learn each KEY and memorize all of the chords and scales.

-or-

Work on a Song. Figure out what KEY that song is in. One way to do this is to look at the chords of that song and see which page of chords from your "cheat sheets" matches it the best. After a while you will notice that certain groups of chords seem to go together often...and that is a KEY!

*Memorize the chords needed for that song.

*GO PRO and learn the Pentatonic Scale and Nashville Numbers!

Getting Started

Go to pianomeditation.com and click on FREE LESSONS. On that page you will find a video link called "Getting Started with Cheat Sheets." Watch this video to better understand "cheat sheets" and how to use them effectively.
