🎬 YOUR FIRST AI YOUTUBE VIDEO: Complete Production Plan

THE VIDEO CONCEPT

Title Options (pick one to test)

1. "You're Using AI Wrong (Here's What Actually Works)"
2. "AI Isn't Magic — It's a Process (What Nobody Tells You)"
3. "The #1 Mistake Keeping You Stuck in 'AI Chat Mode'"

The Core Premise

Most people treat AI like a magic genie — type a vague wish, get disappointed by the result, blame AI.

The *actual* unlock is treating AI like a junior employee: give it clear context, specific tasks, and let it execute while you focus on direction.

This video bridges people from "brainstorming mode" to "execution mode" — which is YOUR unique positioning and what you actually care about.

WHY THIS TOPIC FOR VIDEO #1

✅ Brand Alignment Check

- **Accessible AI for non-tech people?** YES — explains a mindset shift, not code
- **Would a frontline manager care?** YES — they need results, not chat threads
- **Genuinely fun to make?** YES — it's literally your core thesis
- **NOT generic AI content?** YES — most AI channels show "cool tricks," you're showing the *mental model*

✅ Strategic Fit

- **Evergreen**: This isn't news-dependent; it will be relevant in 2 years
- **Authority-building**: Positions you as someone who *thinks differently* about AI
- **Shareable**: The "you're doing it wrong" framing invites debate and shares
- **Gateway video**: Viewers who resonate will subscribe for more

---

FORMAT RECOMMENDATION

Element	Recommendation
Format	Commentary + Screen Demo hybrid
Length	8-10 minutes (Standard)
Style	Talking head + screen recordings + simple graphics
Tone	Conversational, direct, a little provocative

CREATORS TO STUDY

For TOPIC CLARITY & INSPIRATION

Igor Pogany — The AI Advantage

- **Why**: He's the master of "accessible AI for non-tech people" — your exact audience
- **Channel**: youtube.com/@TheAIAdvantage
- **Key videos to watch**:
  - His ChatGPT beginner tutorials (notice how he builds from simple to complex)
  - Any video where he explains "custom instructions" or "prompting"
- **What to steal**: His pacing, his assumption that viewers are smart but new
- **What to avoid**: Don't copy his "clean tutorial" vibe — you want more personality

Matt Wolfe

- **Why**: Covers AI tools for a general audience, high production value, warm personality
- **Channel**: youtube.com/@maboroshi
- **Key videos**: His "AI News" format and tool review deep-dives
- **What to steal**: His enthusiasm without being salesy, his "let me show you" energy
- **What to avoid**: His format is more "news roundup" — yours should be more "thesis-driven"

For STYLE & STRUCTURE

Fireship

- **Why**: The absolute master of tight, punchy, opinionated tech content
- **Channel**: youtube.com/@Fireship

- **Key videos**: Any "in 100 seconds" video, or his longer rant-style videos
- **What to steal**:
  - Fast pacing with purpose
  - Strong opinions stated clearly
  - Visual humor (text on screen, quick cuts)
  - Starting with the problem, not the solution
- **What to avoid**: His audience is developers — yours isn't. Tone down the technical snark.

Howfinity

- **Why**: The "solve a small tech problem, get views forever" model
- **Channel**: youtube.com/@Howfinity
- **Key videos**: Any tutorial under 5 minutes
- **What to steal**:
  - Extreme clarity
  - Solving ONE thing completely
  - No fluff
- **Why relevant for later**: Your "AI tools for managers" videos could follow this format

Ali Abdaal (for longer form later)

- **Why**: Master of accessible educational content with personality
- **What to steal**: His energy, his "let me share what I've learned" framing
- **Not for this video**, but study for when you go longer-form

---

SCRIPT STRUCTURE

HOOK (0:00 - 0:30)

Goal: Pattern interrupt + make a claim worth hearing

> "Most people use AI like they're texting a magic genie. They type something vague, hit enter, and wonder why they got garbage back.
> Here's the problem: AI isn't a mind reader. It's more like a really smart employee who just started day one and has zero context about your life, your business, or what you actually need.
> Today I'm going to show you the one mental shift that changes everything — and it has nothing to do with better prompts."

CONTEXT (0:30 - 2:00)

Goal: Establish the problem and why it matters NOW

Key points to hit:

- The "chat mode" trap: open ChatGPT, ask a question, feel productive but accomplish nothing
- Why this happens: we've been trained by Google to ask questions, not give directions
- The real cost: wasted time, disappointment, giving up on AI too early
- Who this hurts most: busy people (like managers) who don't have time to experiment

Transition:

> "So what's the actual fix? It's not a hack. It's a mindset shift."

CORE CONTENT (2:00 - 7:00)

Goal: Deliver the transformation

The Framework: AI as Day-One Employee

Point 1: Context is everything (2:00 - 3:30)

- Demo: Same request with zero context vs. rich context
- "You wouldn't ask a new hire to 'handle the project' — you'd give them background"
- Show real example on screen

Point 2: Tasks, not wishes (3:30 - 5:00)

- Demo: "Write me a marketing email" vs. "Write a 3-paragraph email to existing customers announcing our new feature. Tone: excited but not salesy. Include a clear CTA to book a demo."
- The difference is *specificity and structure*

Point 3: Direction, not dictation (5:00 - 7:00)

- The "iterate" mindset: AI gets you 80% there, you refine
- Demo: Show taking AI output and asking for revisions
- This is the unlock: you become the *director*, not the typer
- Connect to bigger theme: "This is how you go from chatting with AI to actually building systems"

CALLBACK/CTA (7:00 - 8:30)

Goal: Seal the deal and drive action

Recap:

> "So remember: AI isn't magic. It's a capable employee who needs context, clear tasks, and your direction. Stop treating it like a genie. Start treating it like a partner."

CTA (choose ONE):

- Subscribe: "If this clicked for you, subscribe — I'm going to be sharing more about turning AI into actual systems, not just chat threads."
- Comment: "Drop a comment: what's ONE task you've been trying to get AI to do that never works? Maybe we can figure it out together."
- Next video tease: "Next week, I'll show you how to take this concept and turn it into an actual workflow that runs in the background while you do real work."

THUMBNAIL CONCEPTS

Option 1: "The Mistake"

- **Visual**: Split screen — frustrated person with laptop (left), lightbulb moment (right)
- **Text**: "AI ISN'T MAGIC" (3 words max)
- **Colors**: High contrast, yellow/orange accent

Option 2: "The Truth"

- **Visual**: Your face with skeptical/knowing expression
- **Text**: "USING AI WRONG"
- **Style**: Big face, minimal text, dark background with pop color

Option 3: "The Shift"

- **Visual**: Chat bubble crossed out → Arrow → Flowchart/system
- **Text**: "STOP CHATTING"
- **Style**: Clean, graphic-driven, minimal face

SUPPORTING MATERIALS

Show Notes (for video description)

```
Most people use AI wrong. They type vague requests and wonder why they get garbage back.
```

In this video, I share the ONE mental shift that changes everything about how you use ChatGPT, Claude, or any AI tool.
It's not about better prompts — it's about treating AI like a capable employee, not a magic genie.

TIMESTAMPS:
0:00 - The problem with how most people use AI
0:30 - Why "chat mode" is a trap
2:00 - The mental shift that changes everything
3:30 - Demo: Tasks vs. wishes
5:00 - Becoming the director, not the typer
7:00 - How to start using this today

Social Teasers

Twitter/X Thread (launch day):

> Most people use AI like a magic genie.
> Type a vague wish. Get disappointing results. Blame the technology.
> Here's the shift nobody talks about:
> AI isn't a mind reader. It's a capable employee on day one.
> Would you tell a new hire to "handle the project" with zero context?
> No. You'd give them: • Background info • Clear objectives
> • Specific deliverables • Your standards
> Same rules apply to AI.
> Full breakdown in my new video: [LINK]

TikTok Hook (vertical clip):

> "Most people use AI wrong. They treat it like a genie. But it's actually more like a really smart employee on their first day. Here's what that means..."
> [Cut to 60-second explanation of the core concept]

PRODUCTION CHECKLIST

Pre-Production

- [ ] Watch 2-3 videos each from Igor Pogany and Fireship
- [ ] Record yourself explaining the concept out loud (voice memo) to find natural phrasing
- [ ] Finalize script — time it out loud (should be 7-9 min spoken)
- [ ] Plan screen demos: what windows, what text, what progression
- [ ] Create any simple graphics needed

Production

- [ ] Set up recording environment (good lighting, clean background, quality audio)
- [ ] Film talking head sections (don't worry about perfection — energy matters more)
- [ ] Record screen demos
- [ ] Capture B-roll if needed

Post-Production

- [ ] Edit: prioritize pacing over perfection for V1
- [ ] Add text overlays for key points
- [ ] Create thumbnail (test 2-3 options)
- [ ] Write description and tags
- [ ] Upload and schedule

Launch

- [ ] Post Twitter thread
- [ ] Create TikTok vertical clip
- [ ] Share in any relevant communities
- [ ] Respond to every comment in first 24 hours

FINAL NOTES

The Point of Video #1

This isn't about going viral. It's about:

1. **Getting reps** — learning the production process
2. **Establishing your voice** — finding what feels natural on camera
3. **Planting your flag** — this is what your channel is *about*

4. **Building momentum** — shipping beats perfecting

What Success Looks Like

- You finished and uploaded it
- You learned something about your process
- At least one person commented that it helped them
- You have ideas for Video #2

The Mantra

"I help non-tech people go from AI chat threads to actual systems and automation."

Every video should point back to this.
