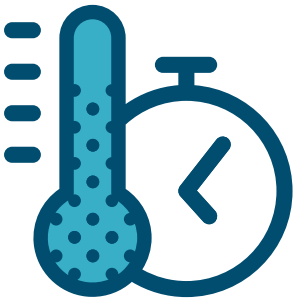
Food Safety

5

Health & Hygiene

Stop the spread of germs from dirty hands and sick Team Members.

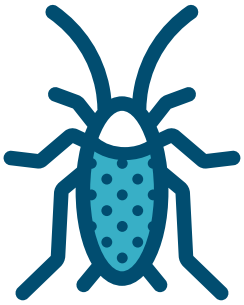


Time & Temperature

Store, hold, cook and cool foods properly to stop the growth of germs.

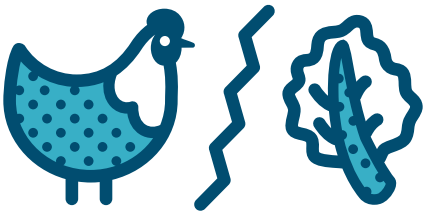
Cleaning & Sanitation

Clean and sanitize food contact and non-food contact surfaces to keep the kitchen free of germs.



Pests

Keep disease-carrying pests away from the Restaurant and grounds.



Cross-contamination

Eliminate biological, chemical and physical contamination hazards; keep raw and cooked/ready-to-eat foods separate.
